Laparoscopic Human Cadaver anatomy & Robotic Procaine cadaver Gynae Surgery Skills Course

Day one of this course will offer intensive hands on practice of a range of 3D laparoscopic gynae procedures using human cadaveric specimens. Expert demonstrations of surgical approaches to the deep pelvis will cover the anatomy of this complex area. Day two will introduce robotic gynae surgery skills using synthetic phantoms, VR and porcine cadavers. Participants will rehearse set up, positioning, manipulation and dissection skills and consider optimal teamworking for successful robotic surgery. Limited places available for surgeons on each day, observation is offered via online video link onsite (limited places) or remote for both days.

10th–11th June 2022

Course Director: Nahid Gul

Faculty will include:

Nahid Gul, NW England
Shaheen Khazali, Surrey
David Rowlands, NW England
Sujata Gupta, NW England

FEES:

Day 1 surgeon: £1,400
Day 1 observer (online): £100
Day 2 surgeon: £500
Day 2 observer (online): £100
Day 1 & 2 surgeon: £1,550
